

CHECKOUT OVERVIEW

From cart to paid.

A clear view of how an Ezkart customer adds products, gets live Biteship Test shipping rates, and completes payment securely through Midtrans Snap Sandbox.

ezkart.id/cart**Purpose**

Merchant onboarding and sandbox checkout review.

Customer promise

No banking credential is entered into or stored by Ezkart.

Demo status

Test provider records are created, but no real charge or courier pickup occurs.

FOUR SIMPLE STEPS

The customer stays oriented from start to finish.

Each step shows the current total and makes the next action explicit. Required information is validated before a shipping quote is created.

1

CART

Add products

The customer adds products, adjusts quantities, and reviews the subtotal before checkout.

OAT

Granola Madu Nusantara

Qty 1 · 320 g

Rp58.000

2

CUSTOMER

Enter delivery details

Full name, WhatsApp number, email, location, street address, and postcode are collected.

Nadia Putri

Kebayoran Baru, Jakarta Selatan

Jl. Senopati No. 10 · 12190

3

BITESHIP

Select a live test quote

Biteship Test returns available couriers, service levels, estimated arrival, and the provider-calculated price.

JNE

JNE REG
Provider ETA

Live rate

J&T

J&T EZ
Provider ETA

Live rate

4

MIDTRANS

Pay securely

The customer chooses an available method and pays in the secure Midtrans Snap checkout.

QR

QRIS & E-wallet

VA

Virtual Account

Credit / debit card

CLEAR RESPONSIBILITY

Midtrans receives what it needs to process payment.

Product selection, delivery details, and shipping choice are completed before the secure payment handoff.

Ezcart + Biteship

Own the shopping and delivery handoff.

- ✓ Cart products, quantities, and weights
- ✓ Customer contact and delivery address
- ✓ Live Biteship Test rate selection
- ✓ Server-validated courier price
- ✓ Paid-order fulfillment reference

MIDTRANS

Owns the secure Snap payment experience.

- ✓ Merchant and order reference
- ✓ Final amount to be paid
- ✓ Item and shipping details
- ✓ Customer contact for the transaction
- ✓ Notification and return destination

Sensitive credentials remain with the payment provider.

Ezcart never requests or stores the customer's card number, PIN, OTP, banking password, or wallet credentials. Midtrans sends a signed notification so Ezcart can update the order.

AFTER PAYMENT

A verified result completes the order.

The customer sees a clear outcome while the merchant receives the reference needed to continue fulfilment.

**Midtrans processes the selected method**

The customer completes all payment-specific actions in the Midtrans Snap experience.

PROVIDER

**Payment notification is verified**

Ezkart treats the provider notification—not a browser action—as the authoritative payment result.

SERVER

**Biteship receives the paid order**

After verified payment, Ezkart creates one idempotent Biteship test order with the chosen courier and package details.

DELIVERY

**The customer receives confirmation**

The result screen shows payment state plus the Biteship test order or waybill reference.

CUSTOMER

Try the interactive sandbox checkout

Add a product and follow the full provider flow. No real charge or courier pickup will occur.
